EARLY FAMILIES OF BETHLEHEM, NH

by Kathleen C. Beals

includes the first known settlers of our community up until those who arrived prior to 1860 census. Kathy states in her introduction that "all facts" in the book have been documented so researchers can further validate the accuracy and validation is encouraged." In the back of this beautiful hard cover book is a section of "Special Interest" and it cites those whose sketches include particularly valuable and interesting data. There is also an appendix of Civil War soldiers and newspaper clippings that add some flavor about the community and experiences of the 19th century. Whether you are looking for genealogy or just good reading, it's a great book!
